Howard Doyle Update

=====
=====
Our shipmate, Howard Doyle, successfully underwent gall bladder surgery this morning and was scheduled to be up and walking this afternoon. Tomorrow, it's planned that he goes home.

Shipmates, we've been able to get these updates and info on Howard because his loved ones -- and even Howard himself -- kept us informed. But Howard is not special. We are all equals as "Bothers of the Phin" and any one of us deserves the same shared updates. But, we have to get the information in to get it out. Please, please, tell your family to let a Base Officer know of anything that happens to you that puts you in dry dock. We all really do care!
